About Me

Frontend & Mobile Developer focused on React and React Native applications with strong attention to UX, performance, and scalable architecture. Experienced in building production-ready interfaces, **API integrations**, and cross-platform mobile solutions.

Specialized in **React**, Redux, and **React Native**, creating intuitive user interfaces, integrating external APIs, and delivering high-quality, scalable code. Passionate about modern technologies, user experience, and continuous learning.

Core Skills

Frontend: HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Redux Toolkit

Mobile Development: React Native (iOS & Android), Expo, native module integration

Styling & Animations: SASS, SCSS, LESS, advanced CSS animations, responsive design

Data & Backend: Axios, Firebase (Auth, Firestore, Hosting), REST API integration, Golang (beginner)

Build Tools & Version Control: Webpack, Gulp, Git, GitHub

UI/UX & Design: Figma, Photoshop, Gimp

Other: CI/CD basics, semantic HTML, accessibility (a11y), performance optimization

AI Tools: ChatGPT, Gemini, Cursor

Education

Frontend Developer Program – Hexlet: HTML, CSS, JavaScript, React.js, Redux

Certifications:

- HTML & CSS. Professional Website Coding
- HTML & CSS. Adaptive Website Coding
- React. Development of Complex Client Applications

Experience

Mentor – HTML Academy (Aug 2023 – Present | Remote)

- Mentored students in HTML, CSS, JavaScript, and React fundamentals.
- Taught semantic HTML, accessibility best practices, and responsive design.
- Provided code reviews, helped troubleshoot issues, and guided students on project architecture.

Lead React Native Developer – Unifier App | Personal Project (Feb 2025 – Present)

- Leading development of **Unifier**, a personal project created with friends for **group sports activities**.
- Building the mobile app with **React Native** and **Expo** as the main developer.
- Implemented user authentication, real-time event scheduling, and push notifications using Firebase.
- Responsible for app architecture, state management, and ensuring smooth cross-platform performance.
